FEE EXEMPT (Neighborhood Operator) (Section 11709)

NOTE: The purpose of the fee exempt (neighborhood operator) pest control license is to allow equipment sharing and cooperation among neighboring growers and to provide for pest control on small acreages and in areas where it is economically unfeasible to hire a licensed pest control business. It is not designed to allow a grower to conduct pest control for hire in competition with licensed pest control business as a sideline to his/her farming operation.

This means that the relationship of the acreage and number of the neighboring parcels and the intent must be considered in relation to the requester's own farming operation in order to determine whether the applicant qualifies for a no-fee pest control business license.
